

Inventory Workbook Skill

Upload the skill file to Claude, give it your FBA Inventory Health report, and get a branded Excel workbook with coverage analysis, stockout risks, and a live restock planner.

What you get

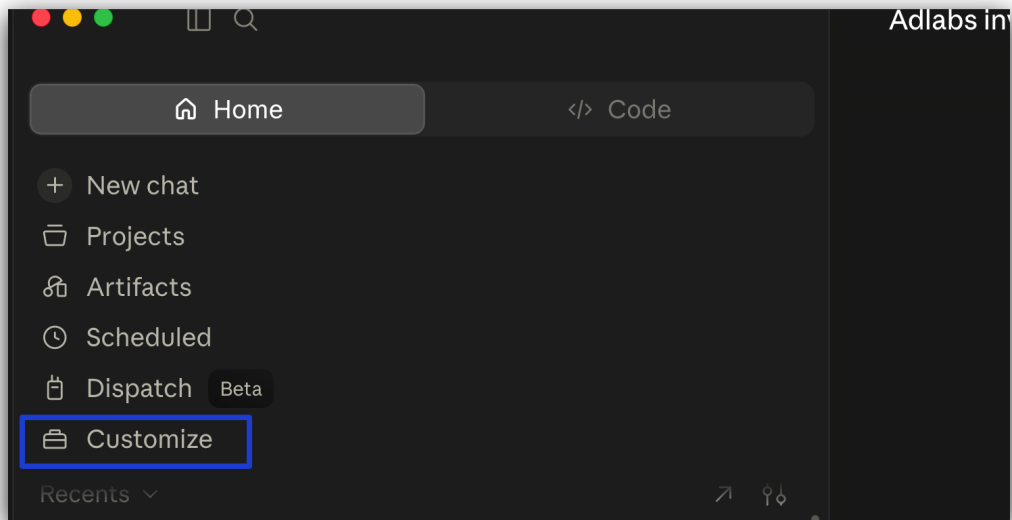

A polished, AdLabs-branded Excel workbook with six sheets: a dashboard with your inventory health verdict and revenue at risk, a full SKU ledger sorted by coverage band, a live restock planner with editable lead time inputs, a methodology sheet, Amazon's official column definitions, and your untouched source data.

Dashboard	Health verdict, revenue at risk, coverage map, action plan
Ledger	Every active SKU with coverage, risk, excess, and flags
Restock planner	Live formulas. Type your lead time, get order quantities and dates
Methodology	Every formula explained and traceable to the source data

STEP 1 · OPEN CUSTOMIZE

Open Customize in Claude

In the Claude desktop or web app, click **Customize** in the left sidebar.

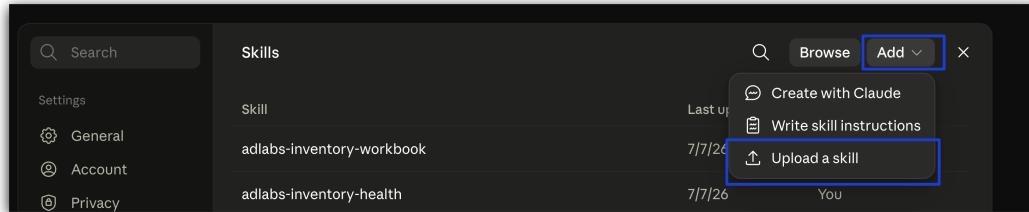

Sidebar → Customize

STEP 2 · UPLOAD THE SKILL

Add the skill file

Go to **Skills** → **Add** → **Upload a skill**. Choose the **adlabs-inventory-workbook.skill** file from the giveaway. It lands in your Skills list, ready to run.

Skills → Add → Upload a skill

STEP 3 · RUN IT

Upload your inventory report

Download your **FBA Inventory Health** report from Seller Central (Reports → Fulfillment by Amazon → Inventory Health → Request .csv Download). Then in any Claude chat, type the skill command and attach the file:

```
/adlabs-inventory-workbook
```

Attach your inventory report to the message. Claude will read the file, run the analysis, and hand you back a branded Excel workbook.

No account connection needed. This skill works entirely from the uploaded file. You don't need an AdLabs account or any MCP setup. Just the skill file and your inventory report.
